Executive Summary

CRM and business management platforms for wealth management firms combine client relationship management, portfolio tracking, and operational workflows into unified systems. The Indian FinTech wealth management market, valued at \$154 billion, presents massive opportunities for platforms that can serve the growing affluent middle class with personalized, compliant, and technology-driven wealth management solutions.

Core Features

#	Feature	Description	Priority	Complexity
1	Client Relationship Management	Comprehensive client profiles with contact history, preferences, family relationships, and communication logs	must-have	medium
2	Portfolio Management Dashboard	Real-time portfolio tracking, performance analytics, and asset allocation visualization	must-have	high
3	Lead Management System	Lead capture, scoring, nurturing workflows, and conversion tracking	must-have	medium
4	Task & Activity Management	Automated task creation, deadline tracking, and activity logging for client touchpoints	must-have	low
5	Document Management	Secure document storage, version control, e-signature integration, and compliance documentation	must-have	medium
6	Calendar & Appointment Scheduling	Integrated calendar with client meeting scheduling, automated reminders, and video conferencing links	must-have	low
7	Financial Goal Tracking	Set and monitor client financial goals with progress visualization and milestone alerts	must-have	medium
8	Compliance Management	SEBI compliance tracking, audit trails, and regulatory reporting for Indian wealth management	must-have	high
9	Communication Hub	Multi-channel communication management including email, SMS, WhatsApp, and call logging	must-have	medium
10	Fee & Billing Management	Automated fee calculation, invoice generation, and payment tracking for wealth management services	must-have	medium
11	Reporting & Analytics	Customizable dashboards and reports for business performance, client metrics, and portfolio analytics	must-have	medium
12	User Role Management	Granular permissions, role-based access control, and team hierarchy management	must-have	low
13	Market Data Integration	Real-time market data feeds for stocks, mutual funds, bonds, and alternative investments	must-have	high
14	Client Portal	Self-service portal for clients to view portfolios, documents, and communicate with advisors	important	medium
15	Mobile Applications	Native iOS and Android apps for advisors and clients with offline capability	important	high
16	Risk Assessment Tools	Questionnaires and algorithms to assess client risk tolerance and investment suitability	important	medium
17	Pipeline Management	Sales pipeline tracking with deal stages, probability scoring, and revenue forecasting	important	medium

#	Feature	Description	Priority	Complexity
18	Tax Planning Integration	Tax loss harvesting suggestions, capital gains tracking, and tax-efficient strategy recommendations	important	high
19	Multi-Currency Support	Handle international investments with real-time currency conversion and multi-currency reporting	important	medium
20	Automated Workflows	Configurable business process automation for onboarding, reviews, and compliance procedures	important	medium
21	Third-Party Integrations	API integrations with banks, brokerages, accounting software, and financial data providers	important	high
22	Performance Benchmarking	Compare portfolio performance against relevant benchmarks and peer groups	nice-to-have	medium
23	Data Import/Export	Bulk data import from existing systems and standardized data export capabilities	nice-to-have	low
24	Customizable Dashboards	Drag-and-drop dashboard builder with personalized widgets and KPI tracking	nice-to-have	medium

Advanced / Differentiating Features

#	Feature	Description	Priority	Complexity
1	AI-Powered Investment Recommendations	Machine learning algorithms to suggest optimal asset allocation and investment opportunities based on client profiles and market conditions	innovative	high
2	Behavioral Finance Analytics	Track and analyze client behavior patterns to optimize communication strategies and predict investment decisions	innovative	high
3	Robo-Advisory Integration	Hybrid human-robot advisory model with automated rebalancing and algorithm-driven portfolio management	important	high
4	Alternative Investment Management	Track and manage alternative investments like REITs, private equity, commodities, and crypto assets	important	high
5	ESG Investment Scoring	Environmental, Social, and Governance scoring for investments with sustainability-focused portfolio construction	important	medium
6	Predictive Client Churn Analysis	ML models to identify clients at risk of leaving with automated retention workflow triggers	innovative	high
7	Voice-Activated Assistant	Voice interface for hands-free data entry, client information retrieval, and market updates	innovative	high
8	Blockchain-Based Trade Settlement	Integration with blockchain networks for transparent, immutable trade records and faster settlement	innovative	high
9	Advanced Risk Modeling	Monte Carlo simulations, stress testing, and scenario analysis for portfolio risk assessment	important	high
10	Social Trading Features	Allow clients to follow successful investment strategies and share portfolio insights within compliance boundaries	nice-to-have	medium
11	Relationship Mapping	Visualize and manage complex family relationships, business connections, and referral networks	important	medium
12	Sentiment Analysis	Analyze market sentiment from news, social media, and client communications to inform investment decisions	innovative	high
13	Virtual Reality Portfolio Reviews	Immersive VR environments for conducting portfolio reviews and financial planning sessions	innovative	high
14	Dynamic Fee Optimization	AI-driven fee structure optimization based on client value, market conditions, and competitive analysis	important	medium
15	Quantum-Safe Security	Future-proof cryptographic protocols to protect against quantum computing threats	innovative	high

Innovative Ideas (Beyond Current Market)

- AI-powered financial advisor chatbot that can handle basic client queries and schedule meetings using natural language processing trained on Indian financial regulations
- Gamification elements where clients earn points for meeting savings goals, completing financial education modules, or referring new clients
- Integration with IoT devices to track spending patterns from smart home systems and suggest budget optimizations
- Augmented reality mobile app that overlays financial information when scanning physical assets like property or artwork
- Predictive life event modeling that anticipates major client milestones (marriage, children, retirement) and proactively suggests financial planning adjustments

- Social impact investing dashboard that shows real-world outcomes of ESG investments with photo/video updates from funded projects
- Micro-learning platform with bite-sized financial education content personalized to each client's investment portfolio and goals
- Digital estate planning with smart contracts that automatically execute inheritance instructions based on blockchain verification
- Climate risk assessment for investment portfolios showing physical and transition risks from climate change
- Integration with government databases for automated KYC verification and tax filing in India
- Collaborative family financial planning tools with shared goals and transparent progress tracking across generations
- AI-powered market timing recommendations based on technical analysis, fundamental data, and macroeconomic indicators specific to Indian markets

Monetization Strategies

- SaaS subscription tiers based on number of advisors and clients
- Transaction-based fees for trade execution and portfolio rebalancing
- Premium features like advanced analytics and AI recommendations as add-ons
- White-label licensing to banks and financial institutions
- Marketplace commissions for third-party financial products
- Professional services for implementation, training, and customization
- Data insights and market research reports as premium offerings
- API access fees for third-party developers and integrations

MVP Scope

Core CRM functionality with client management, basic portfolio tracking, document storage, task management, and compliance reporting. Include essential Indian market integrations like NSE/BSE data feeds, rupee-focused reporting, and SEBI compliance templates. Mobile-responsive web app with basic analytics dashboard.

Competitive Landscape

Existing players like Practifi focus on traditional CRM features for wealth management. Opportunities exist for platforms that deeply understand the Indian market nuances, offer regional language support, integrate with Indian financial institutions, and provide AI-driven insights tailored to Indian investment patterns and regulatory requirements.

Key Metrics to Track

Monthly Recurring Revenue (MRR) | Customer Acquisition Cost (CAC) | Customer Lifetime Value (CLV) | Churn Rate | Assets Under Management (AUM) tracked | Number of transactions processed | User engagement metrics | Time to onboard new clients | Compliance

Go-to-Market Notes

Target tier-2 and tier-3 Indian cities where traditional wealth management tools are underserved. Partner with regional banks and financial advisors. Offer competitive pricing compared to international solutions. Provide extensive onboarding support and local language customer service. Leverage the growing digital adoption in Indian financial services and emphasize compliance with local regulations.
